

Newsletter Issue 8

Autumn 2005

**W**elcome to the latest news round up from Tunit. I hope you have all enjoyed your summer of motoring as the team have here at Tunit. Now the nights are beginning to draw in, and the tans are fading as quickly as those summer memories, then what excitement we all wonder, lies in store between now and the next festive season? Well, despite great efforts the Tunit crystal ball is still in development, so you must consult a psychic on that matter! However, in the following pages we will tell you what's exciting, upcoming and happening from Tunit as well as remind you of the existing quality of service and products we have always offered. Read on to learn about website changes, new vehicle applications and much more.

## Web Developments

The website has not changed now for almost three years and although it is a very strong website with much information the time has come to revamp and update. The problem with changing something that is already good is how do you change that something without losing what is good! Well it's been done! You will still find the Tunit site very informative and helpful, but coupled with an up-to-date look and extra features.

The home site [www.tunit.co.uk](http://www.tunit.co.uk) is acting as the portal for Tunit outlets around the world but not only that - in the coming months it will become the gateway to new avenues of Tunit products. Much more information is now available through the websites and respective distributor websites and from it you should be able to find even more helpful background and product details to help you enhance your car more easily.

On the distributor page there are now direct links to the main Tunit representatives around the UK and overseas. All these branches are our official distributors and we recommend that when you wish to have a Tunit installed you contact these. Their information, training and support comes directly from Tunit headquarters in Chorley, Lancashire where the company started and is still based. As in the past, each distributor site will contain similar product information but particular services and background will be different to each. For example some may offer more extensive services such as dyno rolling road, specialist servicing and other performance products.

Of course all this change does not mean Tunit will follow in the footsteps of your notorious mobile phone company by placing robots in charge on automated push button services. On the contrary, you will always easily find a phone number on any Tunit website where you can speak to a trained professional human being who will be happy to talk to you regarding your needs and requirements. Alternatively, you can fill in the enquiry form on any Tunit website for a prompt response from a sales advisor at the other end.

## Tunit Headquarters

Tunit headquarters has always run its own retail outlet which deals directly with the public, providing Tunit sales, dyno facilities, garage services and much more.

It has always provided a valuable link directly with retail customers and allows the company to obtain feedback from the public. This has now changed and the service has improved even more by running the retail arm under [www.tunitlancashire.co.uk](http://www.tunitlancashire.co.uk) separate to the rest of the organisation. All the same services are still available with a concentration on supplying even more facilities. Servicing and repair are only a small part of what is offered at the Chorley depot. Rolling road dyno runs, club day events, as well as many other performance parts and accessories are available. Please visit [www.tunitlancashire.co.uk](http://www.tunitlancashire.co.uk) for more information.

## Internet Mail Ordering

Ordering through the web has always been available securely, however if you also wish to order securely and electronically from any of the distributors this is now possible through the web site. The whole system has become more streamlined with years added to each model to help when ordering. Also performance filters and other such products are now available through the web.

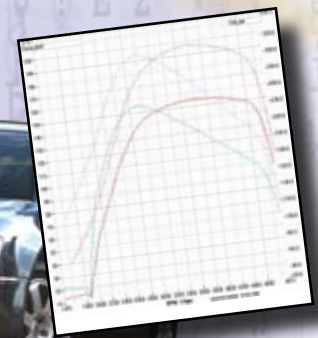

As more and more diesel vehicles are being introduced, along with new and improved injection systems, Tunit continues to upgrade and add new part numbers. The applications have always been specific by power output but now each model on the Tunit site is also listed by year.

## Filters Online

If you wish to order a K&N filter from Tunit then you will find them all on the on line ordering system at Tunit. If your order is for a Tunit and filter together then your filter receives a 10% price reduction. Please ask if you do not see the filter you require.

This will help identify your model more easily. However, you should also take into account other factors, such as late registered vehicles and imports when ordering by this list. The dates are not specific to month, only year, so if the exact model cannot be determined then a phone call or email enquiry to your local distributor will confirm what you need. To see the latest application list visit any Tunit website or request the latest brochure.

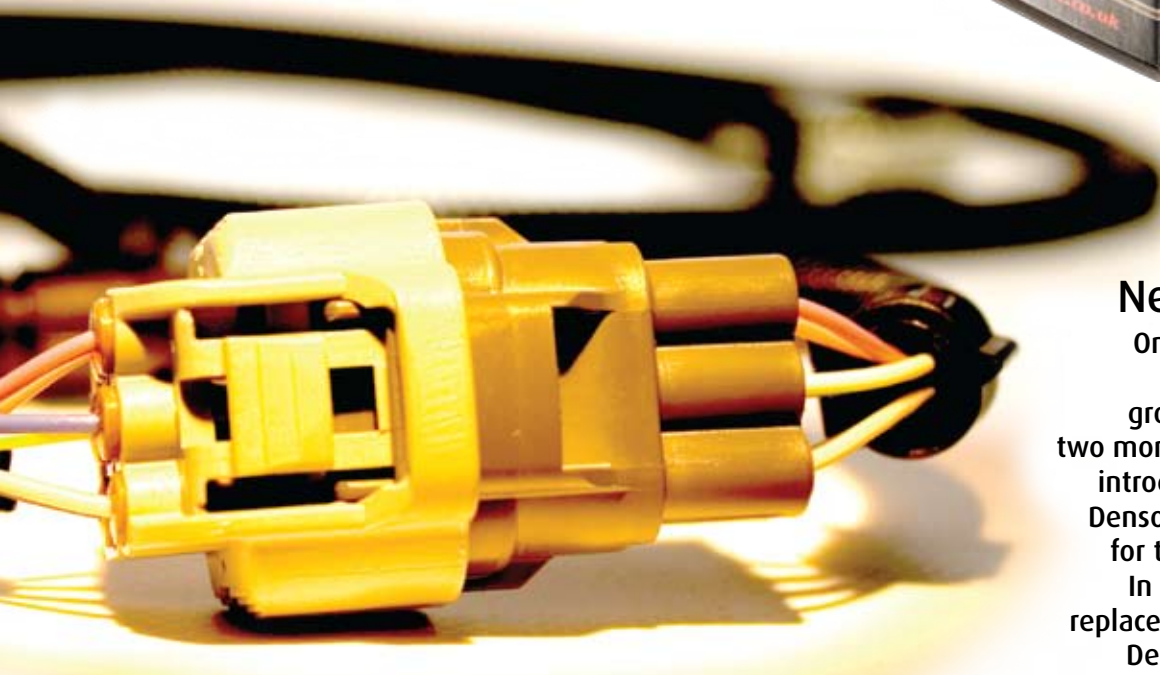

## Extra Information

For the more inquisitive minded of you, there is now a graph in most cases for each particular vehicle or engine to the right hand side of the performance figures. These are usually from the original vehicles used for development and have been extracted from our archives.

If you have any views on the website then all comments will be gladly received by the marketing arm of Tunit, Driven Design. Any comments will be appreciated by [gary@drivendesign.net](mailto:gary@drivendesign.net)

## Part Exchange Tunits

Tunit have always run a successful part exchange scheme through their dealer network. So, if you have purchased within the last two years, maybe you have changed your vehicle, or you just like the features of the new products, and you wish to upgrade for new, then you can take yourself and your outdated beloved Tunit to your respected local representative, for a healthy part exchange. Your old Tunit will be tenderly cared for and found a new home. If you wish to know more about the part exchange option available to you, or, if you are looking to see if there is a quality used option for your vehicle, then please visit the Tunit website.

## New Type of Denso

Only 12 months on from the introduction of the groundbreaking denso Tunit, two more variants have now been introduced. These are the 7 pin Denso 7 and 6 pin Denso 6 type for the 2005 range of Toyotas. In particular the Denso 6 has replaced some of the earlier type Denso 1's and provides more effective power gains.

## Agriculture

Not everybody's idea of performance?? We know, however, that if your favourite cereal did not arrive on the breakfast table you would ask why! Well fear not, Tunit covers more of a range of agricultural vehicles from tractors to combines than ever before! Newly introduced is the brand new PD for stanodyne injection systems on John Deere and Class tractors. The tractor Tunits have manual and electronic adjustment just like all their brothers and sisters... and why not, farmers should get the chance to have some fun too!!

New PD - adjustable for go faster... and go better tractors

## New distributors

Northern Ireland is now covered by a newly appointed distributor.

In the north of Ireland `Ian Getty Agencies` represent Tunit and can be found at [www.tunitni.co.uk](http://www.tunitni.co.uk). Based in the stunning countryside of Ballymena, north of Belfast, Ian Getty Agencies are able to install in their well equipped workshops or supply

direct for self fit. Ian who runs the company is a hands on person with a keen enthusiasm in motor sport. Having had many years of experience in the industry he has finally turned his hand to what he loves best, the performance industry.

In the south of Ireland we have our existing three representatives covering east, west and south. Contact details for these can be found on the [www.tunit.ie](http://www.tunit.ie) website.

## New vehicles added

These are just some of the latest vehicle applications that are now available. (please ask if you do not see what you are looking for !!)

Iveco Cargo C20-CR NTUN272  
Jaguar X Type 2.2d NTUN089  
John Deere - Stanodyne injection system NTUN307  
Range Rover Sport(2005) NTUN098  
Lexus 220d NTUN116  
McCormick Tractors  
Nissan Pathfinder 2.5 Dci NTUN096  
Ssangyong Rexton 2.7 NTUN088  
Steyr Agricultural vehicles with Bosch system  
VW Phaeton NTUN060
